

Beach Wagner qualified engineers design specialised food processing equipment and materials handling systems.

Our experience spans a broad spectrum from raw material processing to carton conveying systems (see overleaf).

Beach Wagner has developed a proven track record in the design of equipment upgrades and modifications in the sometimes confined space of existing installations.

All **Beach Wagner** designs are professionally engineered and digitally prototyped through our 3-D design and analysis procedure, eliminating guesswork on site and ensuring installation in minimum down time and trouble free operation.

For equipment troubled by frequent mechanical failures, **Beach Wagner** offers a service whereby a qualified mechanical engineer will assess all components, conduct failure analysis and provide a report, advising recommended measures and maintenance procedures.

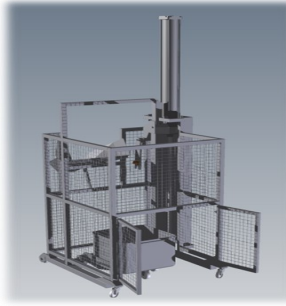

A similar service is available for analysis of high product wastage areas within a production process.

Our broad range of experience in the food and packaging industries enables **Beach Wagner** to assist, by producing concept designs and layouts for AQIS inspections, client audits, R&D and plant extensions and improvements.

Investing in the services Beach Wagner offers has a proven record of short paybacks as noticeable savings are due to trouble free installations, optimised operation and coordinated and planned maintenance.

FOOD INDUSTRY

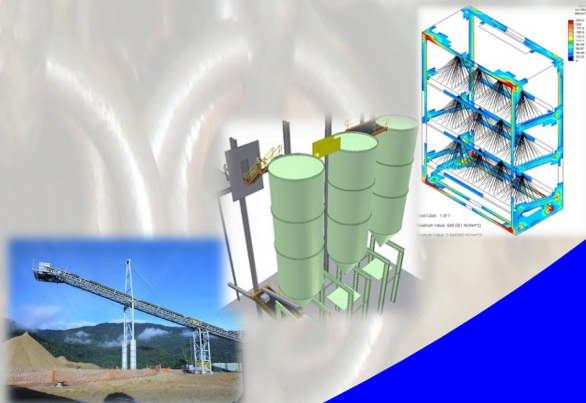

Beach Wagner Designs for the Food Industry

- General Plant Layouts
- Investigations into product wastage
- Investigations into labor saving measures
- Failure analysis
- Energy Audits
- Safety Equipment design
- Storage Bins
- Live Bottom Bins
- Screw Conveyors
- Packing System design
- Access System Design
- Mixers
- Crate and Container Wash Systems
- Custom Designed Fillers
- Packing Tables
- Product Transfers and Manipulators
- General Lifting Devices
- Carton Handling Systems
- Pallet Handling Systems
- Loading Docks
- Bin Lifters

Beach Wagner Designs

Our design objectives of simplicity, safety, economy of manufacture, ease of installation, and efficiency of cleaning and maintenance will ensure a successful and profitable operation at your site.

Lift your productivity with Beach Wagner. We are ready to professionally engineer or certify equipment.
